

Below are character barks for five separate "marauder" characters in a first-person shooter game. They range in difficulty from lowly grunts to the bloodthirsty leader of the group. These would be appropriate for games like Fallout, Far Cry, or Hitman. Tone indicators have also been supplied for the purposes of localization. (These uncouth fellows are used to the grim life of PEGI 18/ESRB M games, so I apologize for their profanity.)
